

PPL Phase 1

Lesson	Description	Duration
Exercise 3: Discovery Flight	Introduction to the training during a short flight	1h 30m
Exercise 4(1): Effects of Flight Controls	Understand the effects of the primary flight controls	2h 0m
Exercise 4(2): Effects of Flight Controls	Understand the effects of the <i>secondary</i> flight controls	2h 0m
Exercise 6(1): Straight and Level Flight	Learn how to fly at constant altitude, heading, and speed	2h 0m
Exercise 6(2): Straight and Level Flight	Learn how to change speed and configuration in straight and level flight	2h 0m
Exercise 7(1): Climbing	Learn how to enter, maintain, and recover from a climb with target heading and altitude	2h 0m
Exercise 7(2): Climbing	Learn about the effects of flaps in the climb, and critical climb speeds and their purposes	1h 30m
Exercise 8(1): Descending	Learn how to enter, maintain, and recover from a descent with target heading and altitude	2h 0m
Exercise 8(2): Descending	Learn about the effects of flaps in the descent, and critical descent speeds and their purposes	1h 30m
Exercise 9(1): Turning	Learn how to perform a level turn and roll level at your target heading	2h 0m
Exercise 9(2) Climbing & Descending Turns	Learn how to safely perform the turn during the climb and the descent	2h 0m
Exercise 10A: Slow Flight	Learn how to safely operate the aircraft at low speeds and the risks associated with it	2h 0m
Exercise 10B(1): Stalls	Learn how to recognise and recover from a full stall with minimal height loss	2h 0m
Exercise 10B(2): Stalls	Practice recovering from stalls during different landing phases	2h 0m
Exercise 11: Incipient Spin	Learn what situations you may end up in a spin and how to prevent them	1h 30m
